Recommended Daily Calorie Intake

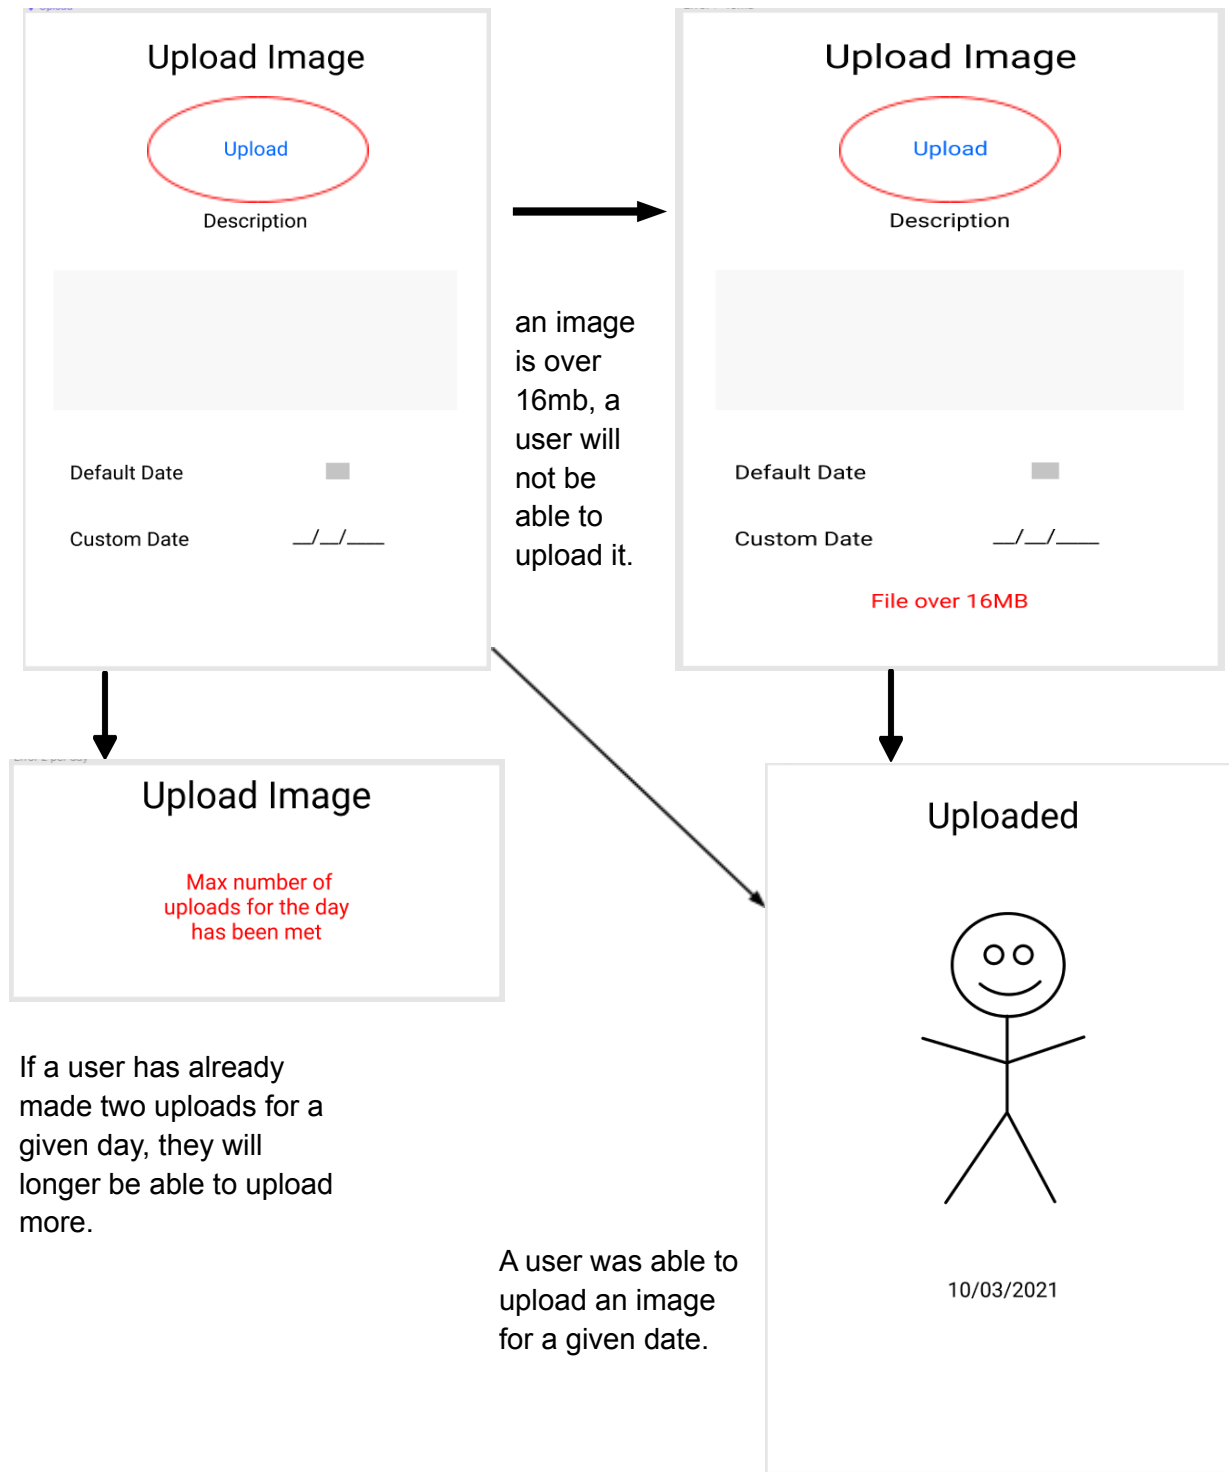

3100 Calories daily 150 lbs current weight

1.5 lbs gain weekly 165 lbs weight goal

After a user successfully submits a questionnaire, their recommended diet will pop out.

Image Upload

Pressing Upload will upload an image for a given day

Calorie Target Not Met

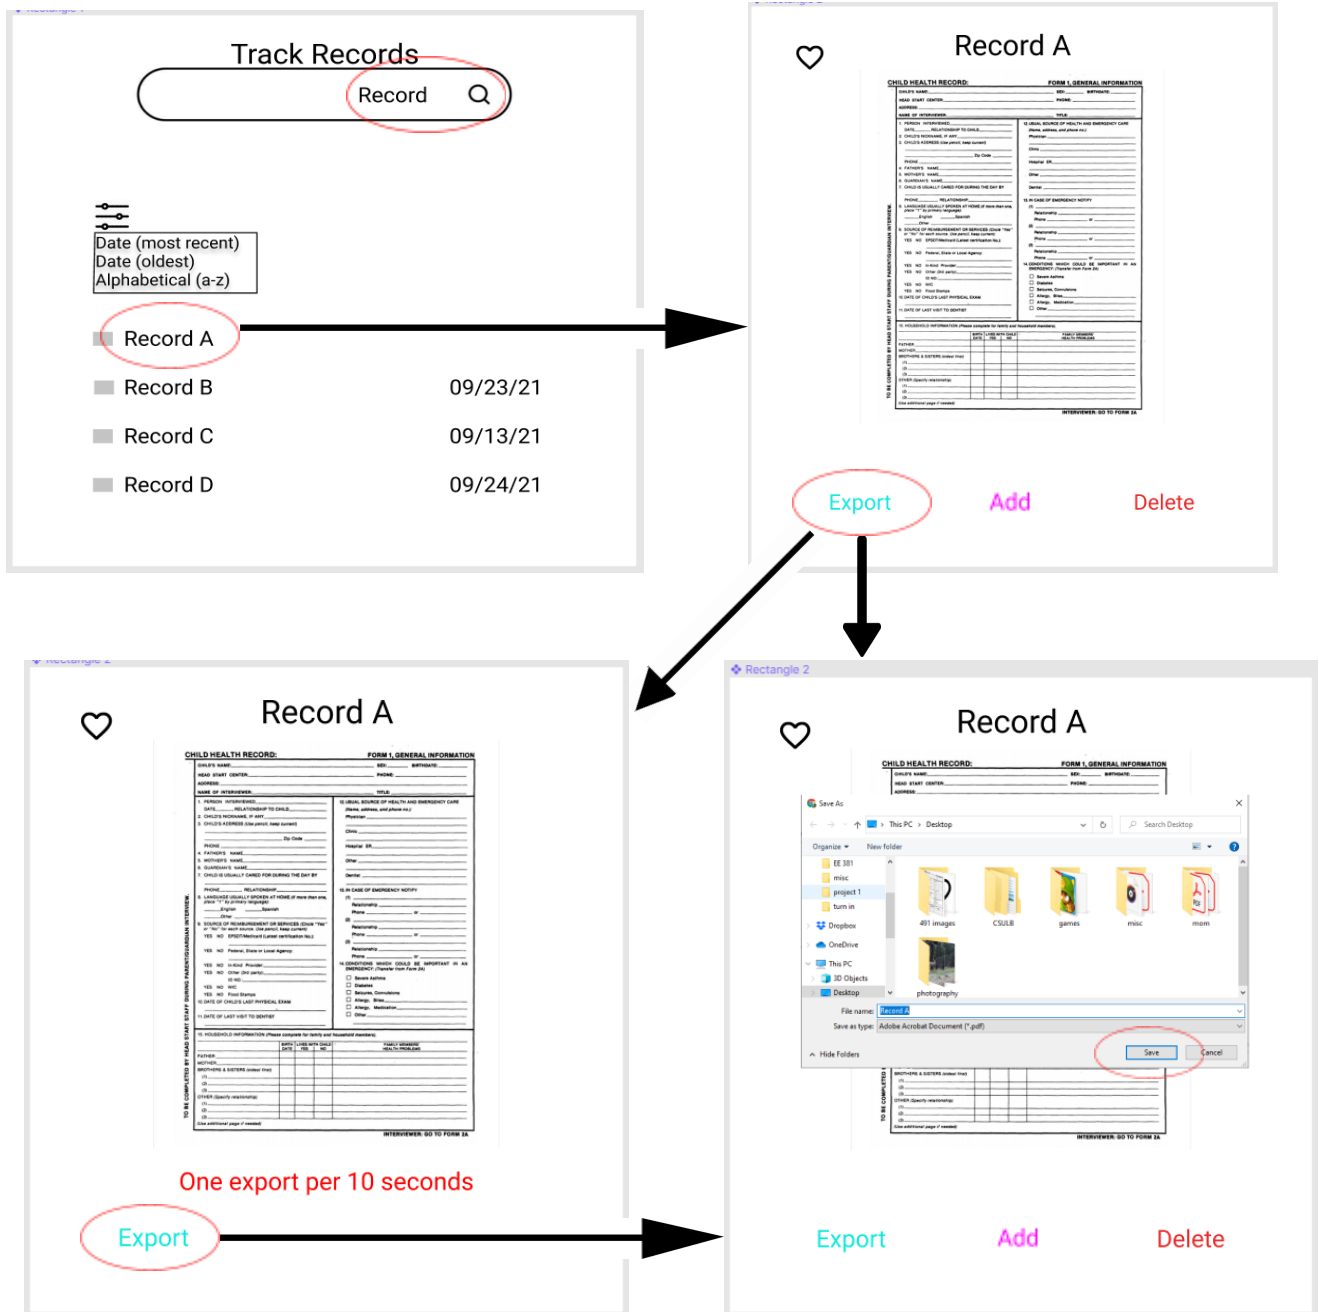

10/1/2021 Calorie goal was 104
calories short

Break Down:
25g of protein short

If a user has not met their daily calorie intake, they will get a notification with a breakdown.

Track Records

Looking up a record will prompt the user to select one or more records to either view, export, delete or add to a folder.

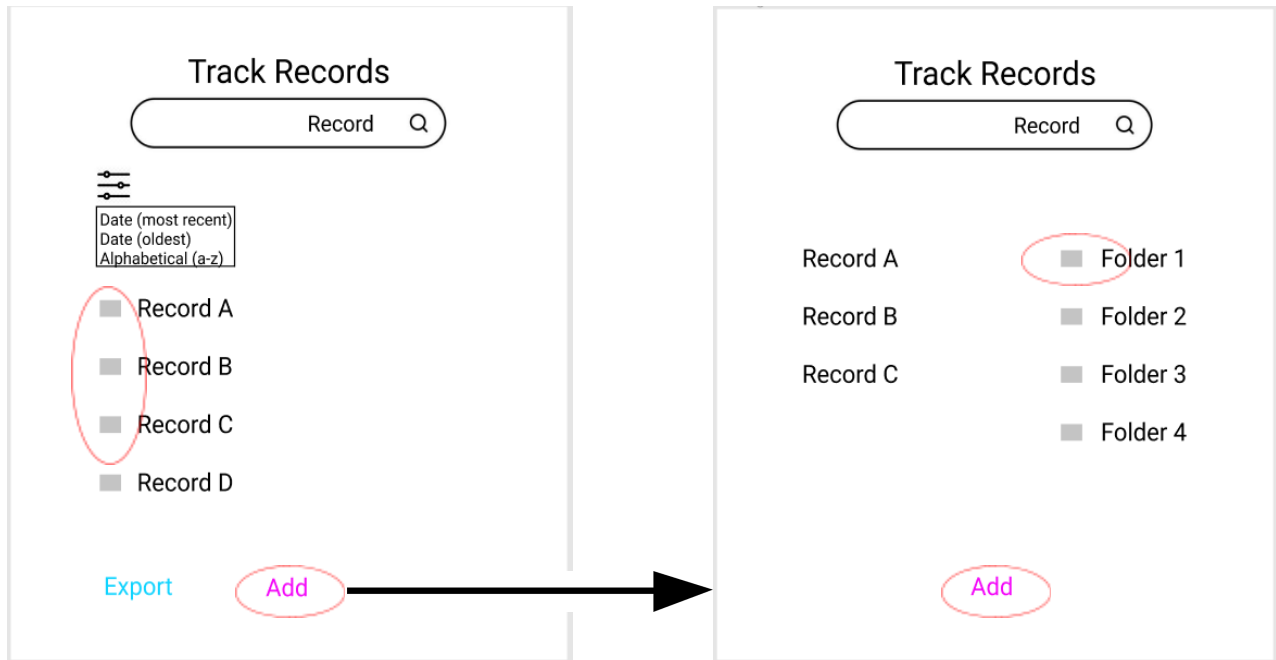

Users can't export more than 2 files within 10 seconds, they'll have to wait and select export once available.

Once a user selects export, they will be prompted to save the file in their pc.

A user selected multiple records to then add to a file

Selecting Add will add the chosen records to a chosen Folder

Medication lookup

Users can lookup a medication, filter by location and save a lookup to save time in the future.

User can then select a pharmacy for more details

After choosing a pharmacy, the user can select lookup nearby locations

Medication Lookup

Advil
