

What went well?

We were able to finish all our tasks. We did well with time management and figuring out everyone's limits. The tasks were done well and dars were approved on time, to let us stay on time.

What went bad?

We underestimated the times on the low levels for our features. A lot of people had less experience than expected so we used more time on low levels than expected.

What We can improve on.

For our next initial set up of low levels, we will increase the times to allow for more learning by around 15% of the topic.
