

The figure displays seven burndown charts and one sprint error chart, all comparing predicted and actual progress over time.

- Burndown Sebastian:** Shows a steady decline in hours, with actual progress slightly below predicted.
- Burndown Angel:** Shows a steady decline in hours, with actual progress slightly above predicted.
- Burndown Jacob:** Shows a steady decline in hours, with actual progress slightly below predicted.
- Burndown Rami:** Shows a steady decline in hours, with actual progress slightly below predicted.
- Burndown Emily:** Shows a steady decline in hours, with actual progress slightly below predicted.
- Burndown Dante:** Shows a steady decline in hours, with actual progress slightly below predicted.
- Burndown ALL:** Shows a steady decline in hours, with actual progress slightly below predicted.
- Sprint Error %:** Shows the error percent for each sprint, with predicted error generally higher than actual error.

[1] Need to have a % error for all previous sprints
