

What went well?

We were able to finish all our core components and all of our team has gotten front-end experience. We were successful in tests and Were able to produce a working back end.

What went bad?

A Team Member was not able to finish their tasks due to personal issues.

What We can improve on.

For our next sprint, we will hold a meeting halfway to see who doesn't think they will finish their tasks. If someone thinks they will fall short, then we will be able to assign a helper to them to take off stress.
