What went well?
We were able to get a lot of work done to finish and improve for our team's individual code reviews

What went bad?
We spent more time learning front end to improve as we did not know very much going on about how to make our design better.

What We can improve on.
I think it will be better if in the future we recognized our front end weakness and attempted to learn more CSS than try to do as much css as possible near the end
